<b>Office Action Summary</b>	<b>Application No.</b> 10/670,243	<b>Applicant(s)</b> MORITANI, TOSHIFUMI	
	<b>Examiner</b> Hoan H. Tran	<b>Art Unit</b> 2852	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because it contains legal phraseology such as “means” and it is longer than 150 words. Correction is required. See MPEP § 608.01(b).
2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Drawings***

3. Figure 3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled “Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

4. Claims 6-9 are objected to because of the following informalities:
  - There is insufficient antecedent basis for the limitation “said first connecting member” in line 16.
  - Claims 7-9 are also objected for the same reason because of their dependency on claim 6.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Yamaguchi et al. [6,834,173]

The applied reference has a common Assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Yamaguchi et al. disclose an image forming apparatus [Fig. 1] comprising an image bearing member [1], a plurality of developing means [40], a rotary member [4] for holding said plurality of developing means, said rotary member including first and second side plates [50], first and second drive receiving parts [50e], a square shaped connecting member [51] connecting said first and second side plates at the center, a rotary shaft [59a] including first and second drive transmitting parts [59] engaging with said first and second drive receiving parts, and a driving source [61]. [See Fig. 3]

Art Unit: 2852

***Allowable Subject Matter***

7. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 6-9 would be allowable if rewritten or amended to overcome the objection(s) set forth in this Office action.

***Prior Art***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Toba et al. [6,941,097] disclose an image forming apparatus having a rotary developing device.
- Isobe et al. [6,983,115] disclose a rotary developing device.
